
Security Testing, Surveillance and Monitoring [1]

Test and monitor the IT security implementation in a proactive way. IT security should be reaccredited in a timely manner to ensure that the approved enterprise's information security baseline is maintained. A logging and monitoring function will enable the early prevention and/or detection and subsequent timely reporting of unusual and/or abnormal activities that may need to be addressed.

There are no PSGs published for this topic; however, the topic is under review for future PSGs
