## [Technology Infrastructure Plan](#) [1]

Create and maintain a technology infrastructure plan that is in accordance with the IT strategic and tactical plans. The plan should be based on the technological direction and include contingency arrangements and direction for acquisition of technology resources. It should consider changes in the competitive environment, economies of scale for information systems staffing and investments, and improved interoperability of platforms and applications.

**There are no PSGs published for this topic; however, the topic is under review for future PSGs.**
