

# Big Data: More than buzz

A new way to do business

GTA Technology Summit 2014

Speaker:

James Ferguson

Practice Principal

HP Enterprise Services

# Agenda

- **Case for big data**
- **Big data and the public sector**
- **Changing landscape of analytics**
- **HP approach**
- **Where to start**
- **Q&A**

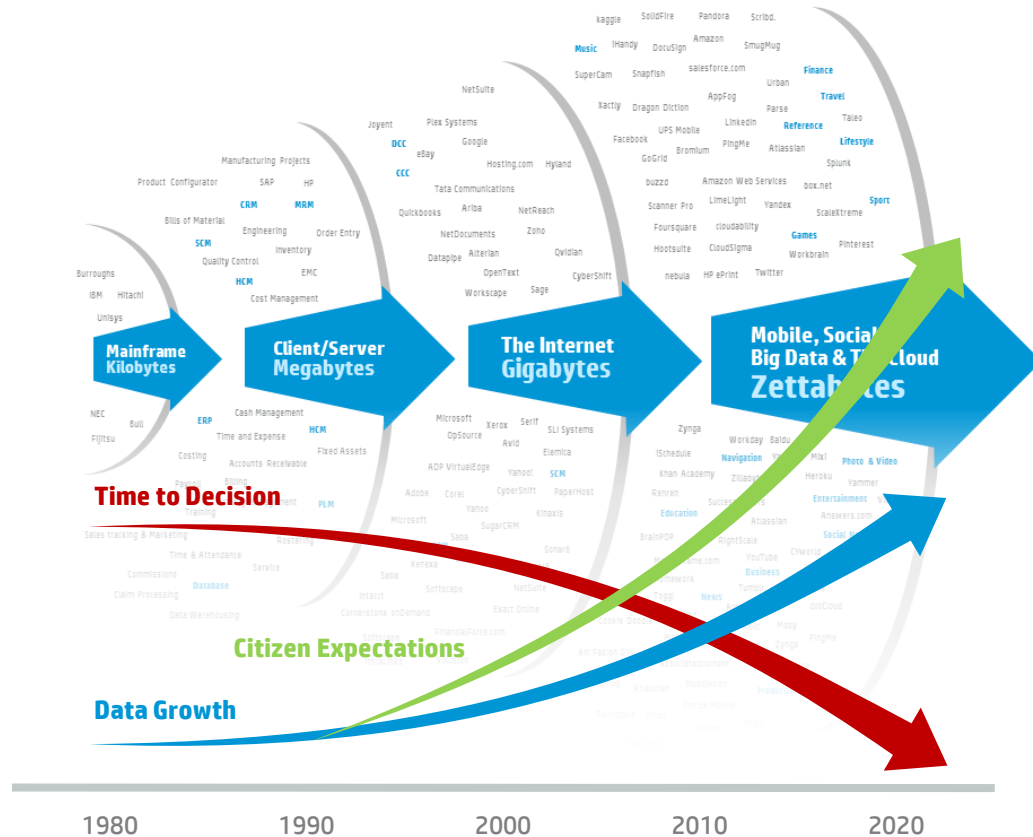

# Case for big data

# Big Data: The changing face of information

# Increased demand for analytics

- ✓ Ingest all forms of data
- ✓ Extract themes/sentiment from social commentary & media data
- ✓ Stream analyze and purge continuous data
- ✓ Implement Hybrid data management environments
- ✓ Data mining & predictive analytics
- ✓ Real time analytics & decision management

**Data is changing the world at an explosive rate, so...**

**Expectations...**

**Drive need for INNOVATION**

# Big data and the public sector

# Big Data: Public Sector

From Meritalk Survey on Big Data 2012 of Government Leadership

**2%**

State & Local  
Governments have a  
big data strategy

**50%**

Not leveraging the data  
they have to drive  
positive outcomes

# Drivers of Big Data in public sector

Engage with constituents  
and government partners

Manage risk across the  
public sector

Improve transparency of  
government

Improve efficiency and  
productivity

Retain and manage data  
for e-discovery and  
compliance

Leverage the value of  
information

Integrate social media and  
intelligence into  
appropriate processes

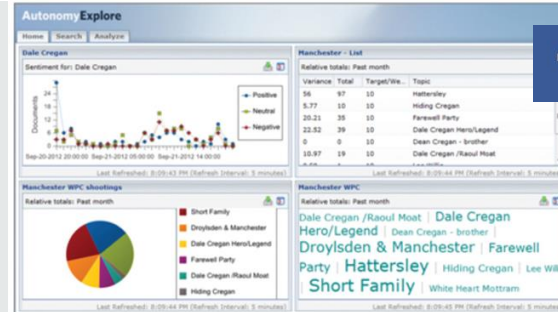

# London Metro Police: Social Media Analytics

Protect and engage citizens for public safety and response

**Near real-time understanding of potential threats enabled police planning and proactive engagement to prevent disorder.** “To be able to monitor sentiment, respond to messages, and reply on a London-wide or national scale is of tremendous benefit.”  
Andrew Watson, MPS Deputy CIO

**Automatic contextual analysis of large volumes of unstructured data** identified new, key influencers in the community along with early identification of potential issues and a gauge of public sentiment.

# Anaheim, CA - ForeSight Situational Awareness Solution

Transform disparate data into actionable information through correlation and analytics

**Empower those responsible for maintaining vigilance, planning, and execution** with heightened situational awareness of resources, assets, and conditions across multiple locations and data sources—all in real time.

**ForeSight provides analytics to** automate information flows, interrogate data elements to discover trends and anomalies, and bring information forward in a secure framework—providing leaders with fast, accurate assessments for informed command decisions.

# HP Earth Insights & Conservation International

Transforming environmental science

**Near real-time data analytics** drives new insights about the world's tropical forests; empowering decision makers to create proactive solutions for conservation management.

**The Wildlife Picture Index (WPI) Analytic System** serves as an early warning system to enable the protection of hundreds of threatened and endangered species.

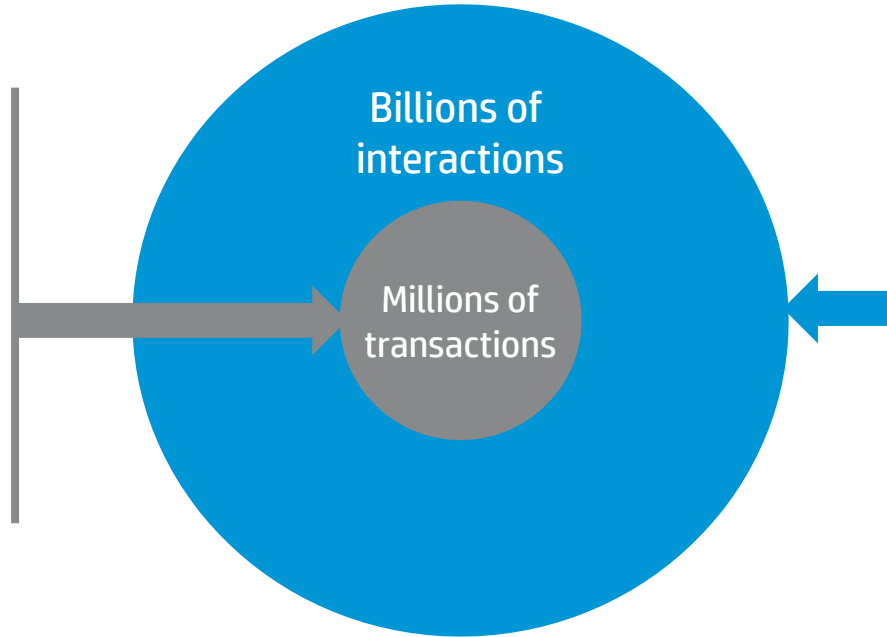

# Changing landscape of analytics

Shift toward analytic automation & integration

# Big data—what does it look like?

- Vehicle registration
- Voter Registration
- Reseller data
- Customer support
- Tax data
- Responses
- Web logs
- Budget data
- Syndicated data

- Online sales
- Downloads
- Call notes
- SMS
- Web chat
- Blogs
- Social networks
- Mobile apps
- Sensors
- Survey response
- Emails
- Videos

**Enterprise information** that comes from line-of-business systems that provide **structured database** information that is used **to run the government**

**Global information** that comes from **internal and external unstructured** sources that is used to gain **insight on the business drivers**

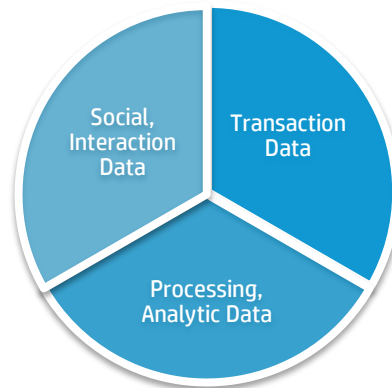

# Big Data needs a unified approach

One platform for structured, semi, and unstructured to benefit from 100% of data.

## Enable me to:

- **Capture**
- **Store**
- **Manage**
- **Analyze**
- **Optimize**
- **Govern**

on

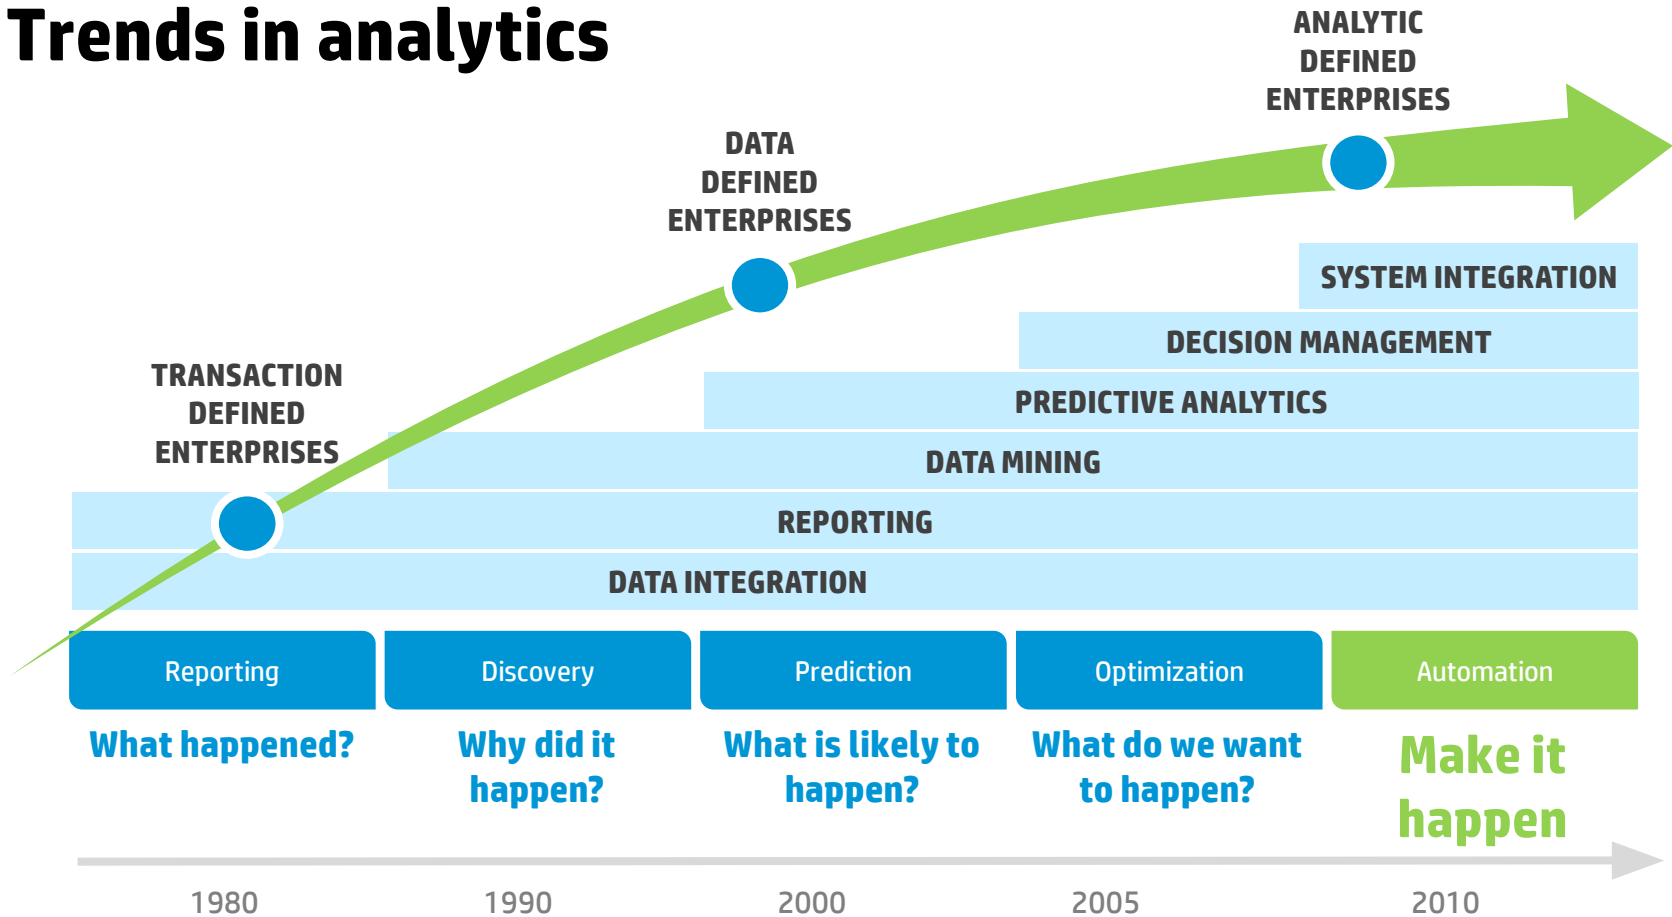

## 100% of data

**Structured (10-15%)**  
CRM, transactions, HR, financial

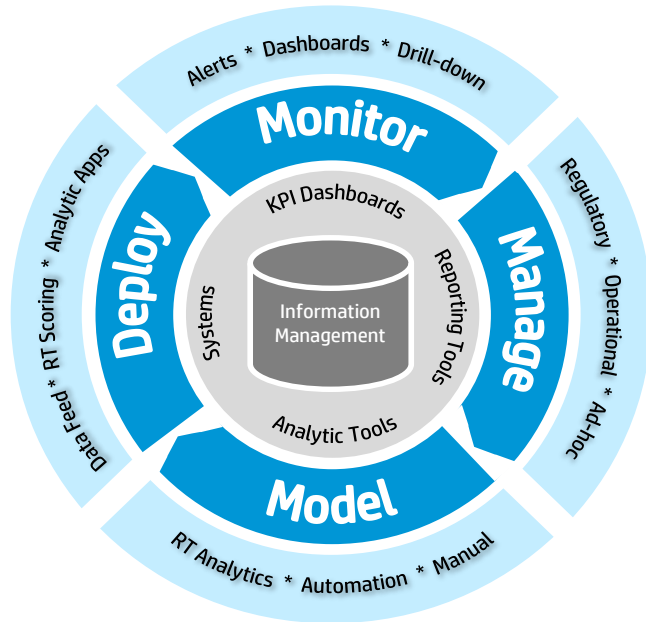

**Unstructured (85-90%)**  
Audio, Video, emails, social media

# Trends in analytics

# Integrating analytics as a closed-loop process

Enterprise Analytic Solutions integrate data science with business intelligence, enterprise applications and business processes to improve decision making and optimize business operations.

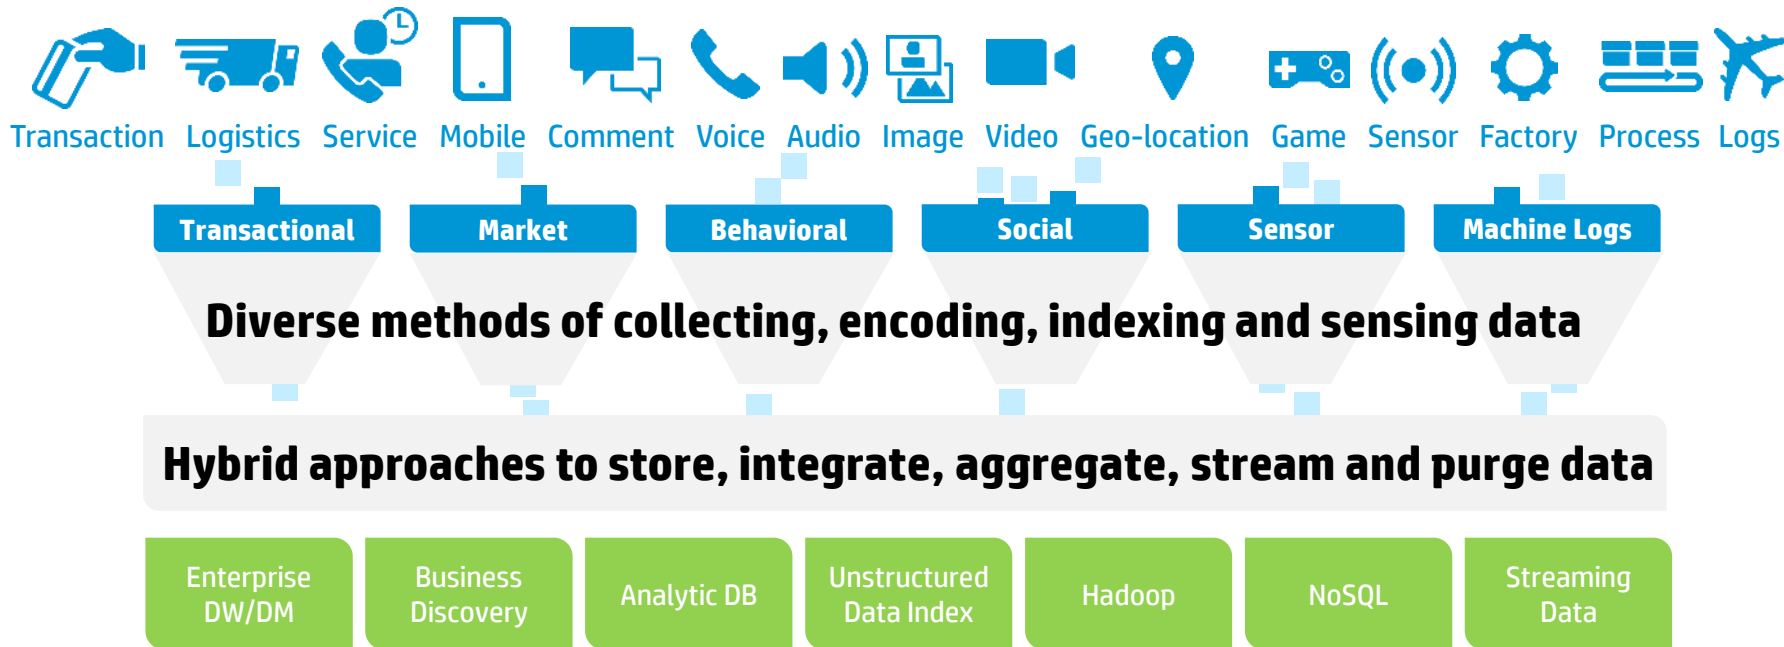

<b>TIER IV</b>	<b>Business</b> <ul style="list-style-type: none"> <li>✓ Business Strategy Alignment</li> <li>✓ Business Process Modeling</li> <li>✓ Management of Change</li> <li>✓ Governance</li> </ul>	Effective Enterprise Analytic Solutions are delivered through the coordination of business processes, analytics, platform management and infrastructure.

# HP approach

## Analytic solution skills and processes

# Hybrid Data Management

# Advanced Analytics – Domains

## Business Analytics

Measure, monitor and predict key indicators of business performance. Use analytics to simulate and forecast business outcomes.

## Contextual Analytics

Combine all available transactional, behavioral, attitudinal, demographic and performance data for a complete 360\* view of products or stakeholders.

## Social/Media Analytics

Collect and analyze external data to understand, monitor and respond to events that impact business objectives.

## Operations Analytics

Analyze systems and processes to identify opportunities for process improvement and predictability.

## Continuous Analytics

Monitor continuous streams of information from sensors and machines to predict and manage performance – in real time.

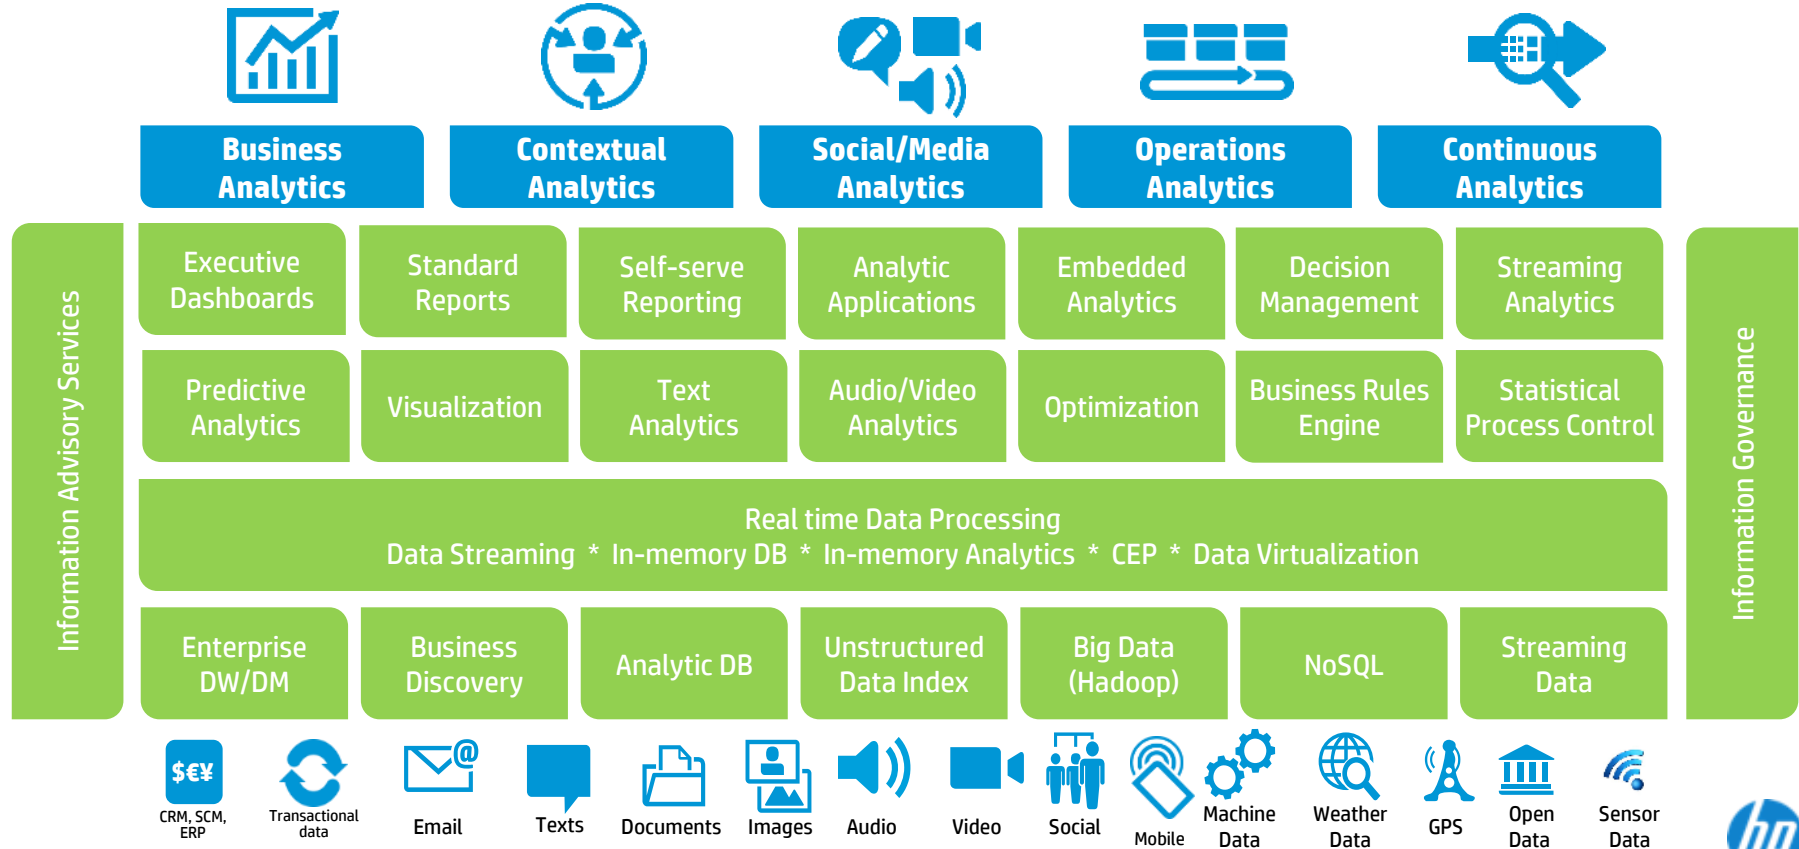

## Executive Dashboards & Reports

## Analytic Modeling and Insight

## Embedded Analytics

# Analytic & Data Management - Capability stack

# Information Advisory Services

Pave your path to innovation with workshops, assessments and discovery environments

- Align business priorities and create roadmaps through collaborative workshops
- Strategically assess the use and value of your data to design information plans
- Explore, test and analyze your data's value within discovery environments

## Benefits

- Accurately identify, assess and test information and Big Data sets before investing capital
- Decrease resource expenditures by leveraging HP's consultants and data scientists, specialized methodologies, tools and private cloud-analytics resources
- Quickly align business and data priorities to drive growth and innovation

## HP Services

- Big Data Discovery Experience
- Information Optimization Transformation Experience Workshop (IO TEW)
- Master Planning
- Business Value Assessment
- Enterprise Data Warehouse (EDW) Assessment

# HAVEn: Big Data platform

Standard platform with connectors, applications, and engines

## Hadoop/HDFS

Catalog massive volumes of distributed data

## Autonomy IDOL

Process and index all information

## Vertica

Analyze at extreme scale in real-time

## Enterprise Security

Collect & unify machine data

## n Apps

Powering HP Software + *your* apps

# Information Governance Services

Govern your information as a strategic asset through a holistic approach

- Classification models to assess what data is relevant and align it to requirements
- Archiving models to optimally organize and control data within a centralized policy engine
- Record management models to manage physical and electronic records reliably and cost-effectively

## Benefits

- Govern information more holistically to maximize its value
- Improve processes for information classification, archiving, and records management
- Experience lower costs, less risk, and greater efficiency

## HP Services

- Classification Services
- Archiving Services
- Records Management Services

# Where to start

# Embark on your path forward

Take the first step towards seizing the power

Business alignment: workshop – business executives and IT

Big Data Initiative: strategy & planning

**Pilot and measure value and build business case for enterprise roadmap and implementation**

Solution: design & implement

Iterative phases

Governance, Maintenance and support

“The power to innovate and drive growth”

# Identify relevant use cases

- **Business & Economy**

- Fraud detection
- Lottery
- Tax & Revenue
- Digital cities

- **Education & Children**

- Child welfare
- Human trafficking

- **Resources & Environment**

- Agriculture
- Wildlife
- Water/air quality

- **Safety & Security**

- Flash point prediction
- Situational awareness

# Summary

- **Identify** your business value and vision
- **Examine** your current state
- **Balance** the demand between your tactical and strategic Big Data initiatives
- **Create** breakthrough changes in how to optimize, leverage, and use your data
- **Build** an executive-business value roadmap that jump-starts your journey
